

Kubeflow Installation & Notebook Setup Guide

1. Clone Kubeflow manifests and install using kustomize.
2. Wait until all pods are running.
3. Port-forward Istio ingress gateway to access dashboard.
4. Open Kubeflow dashboard in browser.
5. Navigate to Notebooks → Create New Notebook.
6. Configure CPU, Memory, and Image.
7. Launch notebook and verify pod is running.
8. Click CONNECT to open JupyterLab.
